Ideation Phase
Brainstorm & Idea Prioritization Template

Date	3 February 2026
Team ID	LTVIP2026TMIDS81059
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The housing market has become increasingly data-driven, with property prices influenced by multiple factors such as house age, renovation history, number of bedrooms, bathrooms, floors, and total area. However, these variables are often analyzed in isolation, making it difficult to identify the true drivers of pricing trends.

We aim to analyze comprehensive housing datasets to uncover relationships between property features and sale prices. The goal is to build an interactive dashboard and story-based visuals that communicate pricing drivers, renovation impact, and feature-based value patterns to support strategic decision-making.

Step-2: Brainstorm, Idea Listing and Grouping

Raw Ideas:

- Visualize total sales trends over time
- Analyze price distribution by renovation age
- Compare house age vs number of bathrooms
- Feature-based price premium analysis
- Renovation impact on property value
- Interactive filters (year built, bedrooms, floors)
- Price per square foot analysis
- Story dashboard for executive insights

Grouped Ideas:

- **Data Visualization:** Dashboard, filters, story views
- **Feature Analytics:** Bedrooms, bathrooms, floors impact
- **Renovation Insights:** Years since renovation vs price
- **Market Trends:** Sales trends, price distribution patterns

Step-3: Idea Prioritization

Idea Group	Importance (1–5)	Ease (1–5)	Priority Score
Dashboard Visuals	5	4	20
Feature Analytics	5	4	20
Renovation Insights	4	4	16
Market Trends	4	3	12

Top Priority: Build an interactive dashboard that integrates housing features, renovation history, and sale price trends to uncover key pricing drivers.
